

The Purpose and Use of your "Grow" Section

You can use this space for Personal Growth Worksheets or Activities designed to create positive change or as a spare area to collect notes from things you are learning from. You can even use this section to add blank paper and turn it into a journaling area...all part of growth!!

Using your "Transformation Path" Page

This Space is designed to give you the freedom and flexibility of capturing information any way you want to facilitate your growth and process of Transformation.

Start by adding what issue or thing you are looking to Transform in the top White Space of the Transformation Path Heading. You may have one you're already working with.

You build your Transformation Path starting with the Labels & Questions on inside page leading to your Creative Solution. Then go back to your cover page and fill in your **Intention, Mantra & Creative Solution** fields, based on your new Creative Solution. As your journey progresses add moments of **Evolution & Celebration!**

The Labels inside your Transformation Path, with accompanied Questions act as a guide to dig into the roots of an issue and pivot into a new way of being with it, creating Transformation. You can use the "Transformation Path Questions" to guide you towards a Breakthrough leading you to Transformation. Celebrate the Growth.
